BOTANY

(Honours Elective)

Paper : BOT-HE-6016

(Industrial and Environmental Microbiology)

Full Marks : 60

Time : Three hours

***The figures in the margin indicate
full marks for the questions.***

1. Answer the following : 1×7=7
- (a) Who coined the term 'antibiotic'?
 - (b) What is the role of leg-haemoglobin in N_2 -fixation?
 - (c) Mention *any two* advantages of immobilized enzymes used in fermentation.

Contd.

- (d) Name *one* microorganism used in commercial production of lipase.
- (e) What is biosorption?
- (f) What is 'Hartig net'?
- (g) Name *one* air-borne bioallergen.

2. Answer the following in short : $2 \times 4 = 8$

- (a) Why is impeller or agitator called as a key component of a bioreactor?
- (b) Write *one* isolation method of soil microorganisms.
- (c) Define synthetic media. Write the composition of *any one* synthetic medium.
- (d) How was water pollution related to 'Minamata' disease in Japan?

3. Write on ***any three*** of the following : $5 \times 3 = 15$

- (a) Characteristics of Microbes used in industrial microbiology
- (b) Air-lift bioreactor

- (c) Basic components of a fermentation medium
- (d) Indicators of water pollution
- (e) Screening of Microbes for casein hydrolysis

4. Answer **any three** of the following :

10×3=30

- (a) Define fermentation. Write briefly about solid state and liquid state fermentations and also mention their various uses in industries.

1+(4+4+1)=10

- (b) What is mycorrhiza? Write about the different types of mycorrhiza. Describe the contribution of arbuscular mycorrhizal fungi in agriculture.

2+4+4=10

- (c) Write about the commercial production of citric acid and its use in various industries.

8+2=10

- (d) Write an essay on bioremediation of contaminated soil. Discuss its advantages and disadvantages.

8+2=10

(e) Write briefly the screening process of microbes used in industries. Why is secondary screening important?

8+2=10

(f) Describe the scope and application of Microbes in biotechnology and other branches of biology.
