CHAPTER 1	INTRODUCTION	1 — 9
CHAPTER II	REVIEW OF LITERATURE	10 — 26
CHAPTER III	MATERIALS AND METHODS	27 — 50
	3.1 Description of study area	27 — 29
	3.1.1 Description of study site	
	3.1.2 Climatic Condition of the Study Area	29 — 34
	3.2 Collection and Identification of Prawn	34
	3.2.1 Key for the field identification.	34 — 35
	3.3 Ecology of <i>Macrobrachium</i>	36
	3.3.1 Physico Chemical Parameters of Water	36 — 43
	3.3.1.1 Collection and preservation	
	3.3.1.2 Physical character of water.	
	3.3.1.3 Chemical character of water.	
	3.3.2 Physico Chemical Analysis of Soil	44 — 46
	3.3.2.1 Collection and preservation of Sample	
	3.4 Bio-chemical (Nutritional) qualities estimation	47 — 50
	3.4.1 Determination of Carotenoid	
	3.4.2 Determination of Ash	
	3.4.3 Estimation of dry matters	
	3.4.4 Determination of Crude Protein	
	3.4.5 Determination of Crude Fibre	
	3.4.6 Determination of Crude Fat	
	3.4.7 Determination of Calcium	
	3.4.8 Estimation of phosphorus	
CHAPTER IV	MATERIALS AND METHODS OF BIOLOGICAL PARAMETERS	51 — 54
	4.1- Biological Studies on four <i>Macrobrachium</i> spp.	
	4.1.1 – Length, weight relationship	51
	4.1.2 – Regression analysis for Length-weight relationship	52
	4.1.3 – Condition limit	
	4.1.4 – Condition factor,	53
	4.2 – Reproductive Biology	
	4.2.1 – Morphological observation of Gonads.	
	4.2.2 – Gonado Somatic Index (GSI)	
	4.3 – Relative Gut Length (RGL) Value	
	4.4 – Estimation of Trace Elements	54
CHAPTER V	RESULTS	55— 141
CHAPTER VI	RESULTS OF BIOLOGICAL PARAMETERS	143—148
CHAPTER VII	DISCUSSION	149—205
CHAPTER VIII	SUMMARY	234—248
CHAPTER IX	BIBLIOGRAPHY	249—282
