

Acknowledgements

I must begin with the acknowledgement of my sincere gratitude to my guide, Professor K. G. Bhattacharyya. I feel greatly obliged by his consent to supervise my work in spite of his hectic schedule. It would have been extremely difficult for me to complete my thesis without his patient and sympathetic guidance through out the course of my research.

I am thankful to my respected teachers of the Chemistry Department, G.U. Dr. B. C. Goswami, Dr. S. K. Bhattacharjee, Dr. O. K. Medhi , Dr. A. K. Mishra and Dr. P.J.Das for their blessings and best wishes.

To my father, late Madan Ch Deka and father - in - law Late Kamata Kanta Deka, I would not dare express gratitude. The completion of this thesis is a tribute to them.

Shri Suren Talukdar and Shri Sailen Sarma of Rangia helped me a lot in my fieldwork. I offer my sincere thanks to both of them.

I am thankful to my friends with whom I have spent last several years, sharing the same laboratory, for their kind help in many ways.

I owe my special thanks to my family members- specially my mother, sisters and brother- for their blessings, inspiration and support. I also extend my sincere thanks to my host of friends, colleagues and well-wishers who have given me encouragement at every stage of my work.

My grateful appreciation also goes to my two little precious daughters – Tilitil and Mitil, for realizing the need to stay away from me, during my study hours much to their pain.

My husband, Sri Dwijendra Nath Deka, has given me constant inspiration and stood by me as a beacon for my work amidst my busy domestic schedule. I have no words to express my gratitude.
