

List Of Tables

Table	Heading	Page
2.1a	Frequency of collection of soil samples (side A)	22
2.1b	Frequency of collection of soil samples (side B)	22
2.2	Analytical conditions for atomic absorption spectroscopic analysis.	36
3.1(a)	pH of soil samples from side A	59
3.1 (b)	pH of soil samples from side B	60
3.2 (a)	Electrical conductivities (mS/cm) of the soil from Side A	63
3.2 (b)	Electrical conductivities (mS/cm) of the soil from Side B	64
3.3 (a)	Bulk density (g/cm^3) of the soil in Side A	68
3.3 (b)	Bulk density (g/cm^3) of the soil in Side B	69
3.4 (a)	Water holding capacities of the soil samples of the study area (Side A)	72
3.4 (b)	Water holding capacities of the soil samples of the study area (Side B)	73
3.5 (a)	Hydraulic conductivity (cm/min) of soil samples in the study area (Side A)	77
3.5 (b)	Hydraulic conductivity (cm/min) of soil samples in the study area (Side B)	78
3.6 (a)	Sand content (%) of the soil samples from the Study Area (Side A)	81
3.6 (b)	Sand content (%) of the soil samples from the Study Area (Side B)	82
3.6 (c)	Silt content (%) of the soil samples from the Study Area (Side A)	83
3.6 (d)	Silt content (%) of the soil samples from the Study Area (Side B)	84
3.6(e)	Clay content (%) of the soil samples from the Study Area (Side A)	85
3.6 (f)	Clay content (%) of the soil samples from the Study Area (Side B)	86
3.7 (a)	Organic Matter content (%) of the soil from the study area (Side A)	92
3.7 (b)	Organic Matter content (%) of the soil from the study area (Side A)	93
3.8 (a)	Total Nitrogen content (%) of the soil (Side A)	98
3.8 (b)	Total Nitrogen content (%) of the soil (Side B)	99
3.9 (a)	Available phosphorous content (mg/kg) of the soil of the study area (Side A).	100
3.9 (b)	Available phosphorous content (mg/kg) of the soil of the study area (Side B)	101
3.10 (a)	Calcium content (meq/kg) of the soil from the study area (Side A)	104
3.10 (b)	Calcium content (meq/kg) of the soil from the study area (Side B)	105
3.11 (a)	Magnesium contents (meq/kg) of the soil in the study area (Side A)	107
3.11 (b)	Magnesium contents (meq/kg) of the soil in the study area (Side B)	108
3.12 (a)	Sodium content (meq/100 g) of the soil samples of the study area (Side A)	111
3.12 (b)	Sodium content (meq/100 g) of the soil samples of the study area (Side B)	112
3.13 (a)	Potassium contents (meq/100 g) of the soil of the study area (side A)	113

3.13 (b)	Potassium contents (meq/100 g) of the soil of the study area (side B	114
3.14 (a)	Al-contents of the soil in Side A (g/kg)	119
3.14(b)	Al-contents of the soil in Side B(g/kg)	120
3.15 (a)	As content of the soil in Side A ($\mu\text{g}/\text{kg}$)	123
3.15 (b)	As content of the soil in Side B($\mu\text{g}/\text{kg}$)	124
3.16(a)	Cadmium (Cd) contents of the soil in Side A (mg/kg)	125
3.16 (b)	Cadmium (Cd) contents of the soil in Side B (mg/kg)	126
3.17 (a)	Chromium (Cr) content of the soil in Side A (mg/kg)	128
3.17 (b)	Chromium (Cr) content of the soil in Side B (mg/kg)	129
3.18 (a)	Cu-contents of the soil in Side A (mg/kg)	131
3.18 (b)	Cu-contents of the soil in Side B(mg/kg)	132
3.19 (a)	Iron (Fe) content (g/kg) of the soil in Side A of the study area	133
3.19 (b)	Iron (Fe) content (g/kg) of the soil in Side B of the study area.	134
3.20 (a)	Mercury (Hg) content (mg/mg) of soil samples in the study area (Side A)	137
3.20 (b)	Mercury (Hg) content (mg/mg) of soil samples in the study area (Side B)	138
3.21(a)	Manganese content (mg/kg) of the soil in Side A of the study area	139
3.21(b)	Manganese content (mg/kg) of the soil in Side B of the study area	140
3.22 (a)	Nickel content (mg/kg) of the soil in Side A of the study area	141
3.22 (b)	Nickel content (mg/kg) of the soil in Side B of the study area	142
3.23(a)	Lead content (mg/kg) of the soil samples in study area of Side (A).	144
3.23(b)	Lead content (mg/kg) of the soil samples in study area of Side (B)	145
3.24(a)	Zinc (Zn) content of soil samples (mg/kg) in the study area of Side (A)	147
3.24(b)	Zinc (Zn) content of soil samples (mg/kg) in the study area of Side (B)	148
3.25	pH of the drinking water samples of the study area	163
3.26	Electrical conductivities (mS/cm) of the water from the study area	163
3.27	Total Alkalinity (mg CaCO_3/L) of the drinking water samples	166
3.28	Total Dissolved Solids (mg/L) of the drinking water from the study area	166
3.29	Total Solids (mg/L) of the drinking water from the study area	169
3.30	Total Hardness (mg/L) of the drinking water from the study area	169
3.31	Phenol (mg/L) in the drinking water samples of the study area	172
3.32	Chloride (mg/L) of the drinking water from the study area	172
3.33	Sulphate (mg/L) of the drinking water from the study area	175
3.34	Fluoride content (mg/L) of the drinking water from the study area	175
3.35	Nitrate - N (mg/L) in the drinking water from the study area	177
3.36	Phosphate (mg/L) in the drinking water from the study area	177
3.37	Ca (mg/L) of the drinking water from the study area	179
3.38	Mg (mg/L) of the drinking water from the study area	179

3.39	Sodium (mg/L) of the drinking water from the study area	182
3.40	Potassium (mg/L) of the drinking water from the study area	182
3.41	Al (mg/L) in the drinking water from the study area	184
3.42	As ($\mu\text{g}/\text{mg}$) in the drinking water from the study area	184
3.43	Cd (mg/L) in the drinking water from the study area	186
3.44	Chromium (mg/L) in the drinking water from the study area	186
3.45	Cu (mg/L) in the drinking water from the study area	187
3.46	Fe (mg/L) in the drinking water from the study area	187
3.47	Mn (mg/L) in the drinking water from the study area	189
3.48	Ni (mg/L) in the drinking water from the study area	189
3.49	Pb (mg/L) in the drinking water from the study area	190
3.50	Zn (mg/L) in the drinking water from the study area	190
3.51	pH of surface water samples in the study area.	196
3.52	Electrical Conductivity (mS/cm) values in the study area.	196
3.53	Total Alkalinity (mg/L) in the surface water from the study area (mg/L).	199
3.54	Total Hardness (mg/L) in the surface water from the study area (mg/L).	199
3.55	Total Solids (TS) values of the study area (mg/L).	201
3.56	Total Dissolve Solids (TDS) content of the study area (mg/L).	201
3.57	Chloride (Cl^-) values of the surface water samples of the study area (mg/L).	203
3.58	Fluoride (F^-) of the water from the study area (mg/L).	203
3.59	Sulphate (SO_4^{2-}) content in the study area (mg/L).	205
3.60	Phosphate (PO_4^{3-}) of the surface water in the study area (mg/L).	205
3.61	Nitrate (NO_3^-) content in surface water samples (mg/L).	206
3.62	Phenol content in the study area (mg/L).	206
3.63	Oil and grease (O&G) content in the study area (mg/L).	209
3.64	Calcium (Ca) in the surface water from the study area (mg/L).	211
3.65	Magnesium (Mg) content in surface water in the study area (mg/L).	211
3.66	Sodium (Na) content in surface water in the study area (mg/L).	212
3.67	Potassium (K) of the surface water samples (mg/L).	212
3.68	Aluminium (Al) of the water from the study area (mg/L).	215
3.69	As ($\mu\text{g}/\text{L}$) content in surface water samples of the study area	215
3.70	Cadmium (Cd) of the surface water from the study area (mg/L).	216
3.71	Chromium(Cr) of the water from the study area (mg/L).	216
3.72	Copper (Cu) of the surface water from the study area (mg/L).	218
3.73	Iron (Fe) of the water from the study area (mg/L).	218
3.74	Manganese (Mn) of the water from the study area (mg/L).	220
3.75	Nickel (Ni) of the surface water from the study area (mg/L).	220

3.76	Lead (Pb) of the water from the study area (mg/L)	222
3.77	Zinc (Zn) of the surface water from the study area (mg/L)	222
3.78	Metals present in the rice grains (mg/kg)	226
3.79	Metals present in the rice husk (mg/kg)	229
