

Studies of some potent medicinal plants of North East India with respect to thermo-physical, chromatographic and crystallographic properties

Contents **Page No.**

Preface	i-iii
List of figures	iv-ix
List of tables	x-xiii

General introduction

Importance of medicinal plants	1
--------------------------------	---

PART-I

THERMOPHYSICAL PROPERTIES OF SOME MEDICINAL PLANT LEAVES & FRUITS

CHAPTER-1

Introduction

1.1. Details of the medicinal plants selected	4
1.3 Review of the previous work	15
1.3.1 XRD studies	15
1.3.2 XRF studies	16
1.3.3 TG, DTG, DTA & DSC studies	17
1.4. The present work	18
1.4.1 XRD Studies	18
1.4.2 XRF Studies	19
1.4.3 TG, DTG, DTA & DSC Studies	19
References: 1	20

CHAPTER-2

General theoretical consideration

2.1. X-ray diffraction analysis(XRD)	27
--------------------------------------	----

2.2. X-ray fluorescence (XRF) analysis	29
2.2.1. Qualitative analysis	30
2.2.2 Quantitative analysis	30
2.3. Differential Thermal Analysis (DTA)	32
2.3.1 Mathematical Expressions	33
2.3.2 Differential scanning calorimetry (DSC)	34
2.3.2(a). The DSC signal \dot{H}	35
2.3.2(b). Basic equations of Reaction Kinetics	37
2.3.2 (c). Relation between DSC signal and Reaction Kinetics	38
2.3.2(d) Practical use of the kinetic parameters	39
2.3.3. Thermogravimetry analysis (TGA)	39
2.3.3(a) Kinetic studies from TG curves	41
References: 2	47

CHAPTER-3

Materials & experimental arrangement

3.1 Materials	48
3.2. X-ray diffraction (XRD) analysis	48
3.2.1. Diffractometer	48
3.2.1.1. Samples mounting	48
3.2.1.2. Measurement	49
3.3. X-ray fluorescence (XRF) analysis	49
3.4 Differential Thermal Analysis (DTA)	51
3.4.1 Experimental arrangement	52
3.4.2 Preparation of samples	53
3.4.3 Temperature measurements and recording	53
3.5. Thermogravimetry (TG) and Derivative Thermogravimetry (DTG)	56
3.5.1 Experimental arrangement	56
3.5.2 Measurements	57
3.5.3 Source of errors and their elimination	58
3.6 Differential Scanning (DSC) Analysis	58
3.6.1 Experimental arrangement	59

3.6.2 Calibration of DSC apparatus	61
3.6.3 Measurement and recording	61
References: 3	62

CHAPTER-4

Results and discussion

4.1. X-ray diffractogram analysis	63
4.2. X-ray fluorescence spectroscopy study	76
4.3. Study of thermal decomposition of medicinal plant leaves & fruits sample using TG, DTG, DTA and DSC techniques	88
4.4 Independent discussion of thermal decomposition of the segment	108
4.4.1 Segment S ₁ of thermal decomposition for the leaves and fruits sample	108
4.4.2 Segment S ₂ of thermal decomposition for the leaves and fruits sample	109
4.4.3 Segment S ₃ of thermal decomposition for the leaves and fruits sample	111
4.5 DTA results for the leaves & fruits sample	112
4.6 Differential scanning calorimetry (DSC)	113
4.7 Evaluation of kinetic data	114
Conclusion	126
References: 4	127

PART-II

CHROMATOGRAPHIC SEPERATION TECHNIQUES

CHAPTER-1

1.1. General introduction of column and thin layer chromatography	129
1.1.1. Chromatography	129
1.1.2. The adsorbent	129
1.1.3. The solvent	130
1.1.4. Interactions of the Compound and the Adsorbent	131
1.1.5. Analysis of column eluants	131
1.2 Chromatography theory	131
1.2.1.Retention	131

1.3 Thin layer chromatography (TLC)	134
1.3.1 TLC Adsorbent	135
1.3.2 Interactions of the compound and the adsorbent	135
1.4 Nuclear magnetic resonance spectroscopy	135
1.4.1 Introduction	135
1.5 A few of the techniques adopted generally for structure elucidation	136
1.5.1 Nuclear spin and the splitting of energy levels in a magnetic field	136
1.5.2 The absorption of radiation by a nucleus in a magnetic field	136
1.5.3 Chemical shift	138
1.5.4 Spin - spin coupling	139
1.6 Mass spectrometry	139
1.7 IR-Spectroscopy	140
References:1	142

CHAPTER-2

Chromatographic isolation & study of the plant *Chisocheton paniculatus*

2.1 Plants of Meliaceae family	144
2.2 Introduction to the plant <i>Chisocheton paniculatus</i> Hiern	144
2.3 Sample collection	144
2.4 Chemical Constituents	145
2.5 Extraction of fruits of <i>Chisocheton paniculatus</i>	145
2.5.1 Extraction and isolation of Paniculatin (MK 001)	145
2.5 Result and discussion	154
References: 2	155

CHAPTER-3

Chromatographic Isolation of the plant *Cudrania javanensis*

3.1 <i>Cudrania javanensis</i> , Trecul, Moraceae	157
3.2 Sample collection	157
3.3 Chemical Constituent	159
3.4 Flavonoids	159
3.5 Extraction of fruits of: <i>Cudrania javanensis</i>	161
3.5.1 Extraction and isolation of <i>Cudrania javanensis</i>	161

3.6 Result and discussion	171
References: 3	173
CHAPTER-4	
Chromatoraphic profiling of the isolated compounds	
4.1 Introduction	174
4.2 Present work	178
4.3 Experimental	179
4.4 Result and discussion	180
4.4(a) Fruits extract of <i>Cudrania javenensis</i>	180
4.4(b) Fruits extract <i>Chisocheton peniculatus</i>	180
References: 4	191

PART-III

MOLECULER & SINGLE CRYSTAL STRUCTURE ANALYSIS

CHAPTER-1

Molecular & single crystal structure analysis

1.1 Introduction to single crystal x-ray diffraction	193
1.2 Some theoretical Aspect of Crystal Structure	194
1.2.1 The Crystal and its symmetry	194
1.2.1(i) Point Groups	195
1.2.1(ii) Space groups	196
1.2.2 Reciprocal lattice	196
1.3 Structure and its determination from x-ray diffraction data analysis	198
1.4 Solution of the phase problem by direct method	199
1.4.1 Direct methods	200
1.4.2 Strong and weak structure factors	201
1.4.3 Unitary and normalized structure factors	202
1.4.4 Wilson statistics (distribution of intensities)	203
1.4.5 Harker-Kasper inequalities	205

1.4.6 Triplet phase relationships	206
1.4.7 Phase determining formulae	207
1.4.8 Structure invariants and semi invariants	210
1.5 Refinement of structure	212
1.5.1 Estimated standard deviations from least –squares	214
1.6 Experimental procedure	214
1.6.1 Selection of suitable crystals	214
1.6.2 Preliminary investigations by x-ray photographic technique	215
1.6.3 Determination of space groups	215
1.6.4. Collection of intensity data	216
1.7 Factors affecting x-ray intensity	217
1.7.1 Absorption and extinction effects	218
1.7.2 Scaling of data	219
1.8 Calculation of interatomic distances and angles	220
1.8.1 Bond lengths	220
1.8.2. Bond angles	221
1.8.3 Torsion angles	222
1.9(a) Computer program used	223
1.9(a).1 Shelx-76	223
1.9(b) Shlex 97	224
1) Normalization	224
2) Invariants and semi invariants	224
3) Starting set	224
4) Phase extension and refinement	225
1.10 (a).2 Shelxs-86	225
1.10 (b).2 Statistical tests	227
1) Goodness of fit (s)	227
2) Ortep	227
References: 1	228

CHAPTER-2

Molecular and crystal structure of compound “6 α acetoxy azadirone” from *Chisocheton paniculatus*. [C₃₀H₃₈O₆] (MK-001)

2.1 Introductions	231
2.2. Crystal growth	232
2.3 Selection of the crystal	232
2.4 Experimental	232
2.5 Results and discussions	236
2.6 Evaluation of symmetry elements	239
2.7 Data collection and reduction	240
2.8 Structure determination	241
2.9 Bond angles and bond lengths (Å)	241
2.10 Conformation of the molecule	242
2.11 Molecular packing	243
2.12 Conclusions	244
References: 2	270

CHAPTER-3

Molecular and crystal structure of 5, 7, 4'-trihydroxy-6, 3'- diprenylisoflavone. (MN-02) [C₂₅ H₂₆ O₅]

3.1 Introduction	272
3.2 Crystal growth	272
3.3 Selection of the crystal	273
3.4 Experimental	273
3.5 Results and discussion	275
3.6 Evaluation of symmetry elements	277
3.7 Data collection and reduction	279
3.8 Structure determination	279
3.9 Bond angles and bond lengths (Å)	280
3.10 The phenyl ring	280
3.11 Conformation of the molecule	281

3.12 Molecular packing	281
3.13 Conclusion	282
References: 3	308

CHAPTER-4

Molecular and Crystal Structure of Compound. {5-hydroxy-3-(3-hydroxyphenyl)-8,8-dimethyl-6-(3-methylbut-2-enyl)-4H.8H-pyrano [2,3-h]chromen-4-one}, (MN-01) [C₂₅H₂₄O₄]

4.1 Introduction	310
4.2 Crystal growth	310
4.3 Selection of the crystal	311
4.4 Experimental	311
4.5 Results and discussion	314
4.6 Evaluation of symmetry elements	315
4.7 Data collection and reduction	317
4.8 Structure determination	317
4.9 Bond angles and bond lengths (A)	318
4.10 The phenyl ring	318
4.11 Conformation of the molecule	320
4.12 Molecular packing	320
4.13 Conclusion	321
References: 4	343
General Conclusion	345
Scope of future works	349
Appendix-I	A 1-48
Appendix-II	A 1-29
Appendix-III	A 1-29
