ZOOLOGY

(Honours Core)

Paper : ZOO-HC-4036

(Biochemistry of Metabolic Processes)

Full Marks : 60

Time : Three hours

The figures in the margin indicate full marks for the questions.

1. Answer the following questions : $1 \times 7 = 7$
- (a) What are aquaporins ?
 - (b) Which shuttle mechanism is used in the cells of skeletal muscle and brain ?
 - (c) ATP is a coenzyme/isozyme/apoenzyme.
(Choose the correct option)
 - (d) The major site of gluconeogenesis is _____.
(Fill in the blank)

Contd.

- (e) Palmitic acid is straight chain saturated fatty acid. *(True/False)*
- (f) Give an example of glucogenic amino acid.
- (g) The inner mitochondrial membrane is impermeable to H⁺ ions/OH⁻ ions / K⁺ ions. *(Choose the correct option)*

2. Answer the following questions briefly :

2×4=8

- (a) Differentiate between anabolism and catabolism.
- (b) Define substrate level phosphorylation with example.
- (c) Write the significance of urea cycle.
- (d) Why is acetyl-CoA called as a key metabolite precursor ?

3. Answer the following questions : **(any three)**

5×3=15

- (a) What is shuttle system ? Describe the malate aspartate shuttle system.
- (b) Give an account of ketogenesis and its regulation.

- (c) Write elaborately about inhibitors of electron transport system.
- (d) Describe briefly the pathways of formation of glycogen.
- (e) "ATP is the energy currency of the cell." Justify the statement.
4. (a) Describe elaborately the process of glycolysis. Add a note on its regulation.
8+2=10

Or

- (b) Describe the pentose phosphate pathway of carbohydrate metabolism. Mention its significance. 8+2=10
5. (a) Give an account of various steps of Krebs cycle. Why this cycle is called an amphibolic pathway? 8+2=10

Or

- (b) What are various complexes of Electron Transport System (ETS)? Describe the flow of electron through the complexes with illustration. 4+6=10

6. (a) Describe the process of β -oxidation of saturated fatty acid with even number of carbon atoms along with its energetics. $8+2=10$

Or

- (b) What is transamination ? Describe the mechanism and significance of transamination. How does it differ from deamination ? $1+6+2+1=10$
-
